

AIYA MUKHAMEDSALOVA

SOFTWARE ENGINEER (FRONT-END)

Innovative and creative Software Engineer with in excess of 4 years extensive experience in frontline development and testing of web-based applications. My strong background includes front-end development using HTML5, CSS3, SAAS/SCSS, JavaScript and React – in addition to knowledge of version control systems such as SVN and Git, and a thorough understanding of object-oriented programming and design patterns.

EXPERIENCE

SEEK International

Software Engineer (Front-End)

Kuala Lumpur

10.2019 - Present

- Building Reusable component for multiple projects in React Js.
- Developing UI that meets the requirement from either mocks or prototypes.
- Have experience in Back-end using GraphQL and serverless.
- Manage structure for the front end code and bridge the gap between graphical designer and technical implementation.

SEEK International

Front-End Developer

Kuala Lumpur

11.2017 - 10.2019

- I have worked closely with internal Product and Marketing Teams, and external agencies when required, to deliver innovative features across all digital touchpoints, and produce concepts into fully-functional user-validated product, through the use of our CMS(HubSpot).
- In the midst of developing features in ReactJS for new platform on SRP pages to deliver increased website lead generation.
- I have worked with Product Designer and Marketing Team to commence solo development of two separate new landing page designs across both desktop and mobile, to be editable by Marketing Team.
- Owner of all HubSpot page, HubL and EDM technical development.

Trusted Company

Front-End Developer

Kuala Lumpur

12.2016 - 11.2017

- I was involved in some projects for TrustedCompany to develop web based user interfaces using modern technologies using web 2.0 tools and technologies.
- I was assured that all user input is validated before submitting to back-end.
- My responsibilities included translation of the UI/UX design wireframes to actual code that will produce visual elements of the application.
- I worked with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.
